

Pathologists can now easily view and incorporate relevant clinical results into their Anatomic Pathology reports

NovoPath, Inc. introduces the Clinical Results Management module add-on to its NovoPath™ Anatomic Pathology (AP) Software to support the growing demand for AP and Clinical results integration. This module offers a simple way to view clinical results in an organized and tabulated format. These results may be used as a reference by the pathologist, or included in the patient's report for a comprehensive clinical and AP report.

This module augments NovoPath's seamless data exchange with clinical instruments and systems by storing and viewing discrete clinical results and associated flags and ranges in NovoPath™. With this module, NovoPath™ gives AP labs the power to produce clinical only reporting.

- Automatically import clinical results and relevant notations in an easy to read, organized and tabulated format
- Easily view and access clinical results within NovoPath™ for a comprehensive perspective
- Store clinical-only or clinical and AP results in one patient record and under a single accession for same day tests
- Generate sophisticated and integrated clinical and AP reports, clinical-only reports, or AP only reports
- Produce customizable trending reports and correlate with AP results using the discrete clinical and AP data stored in NovoPath™

The screenshot displays the 'Clinical Results - Case# S15-00050' window. On the left, a sidebar lists various test categories such as 'Arterial Blood Gas', 'CBC W/PATH REVIEW PER...', 'Hepatitis B Surface Antigen', 'Acute Hepatitis Panel', 'Basic Metabolic Panel-III', 'Creatinine-IF', 'Lead', 'Prostate Specific Ag. Serum', and 'Urine'. The main window shows a table of clinical results for 'CBC W/PATH REVIEW PERIPH SMEAR'. The table includes columns for Analyte, Result, Flag, Units, Reference Range, and Notes. Key results include WBC (33.2), TOTAL NEUTROPHILS.% (39.5), NEUTROPHILS.ABSOLUTE (1541), HEMATOCRIT (45.1), and ERYTHROCYTES (203). A 'PATHOLOGY REPORT' overlay is shown in the foreground, containing patient information (Test, Test, DOB: 01/01/1945, AGE: 70 yrs, SEX: M, PHYSICIAN: JOHN SMITH, M.D.), accession number (S15-00051), and a diagnosis section stating 'No evidence of neoplasm in submitted specimen. Correlation with clinical data as well as other hematologic parameters possibly including cytogenetic studies is suggested.' The report also includes a 'CLINICAL RESULTS' table with columns for Analyte, Result, Flag, Units, Reference Range, and Notes, mirroring the data in the background window.
