

NovoPath™ CTMS for Labs Conducting Clinical Trials Testing

NovoPath introduces its Clinical Trial Management System for AP labs performing clinical trials, as well as for full-service CROs. This fully-compliant system will reduce manual operations, increase data reliability and security, and improve communications.

- NovoPath's CTMS provides an intuitive and user-friendly interface for study setup. Looking up study information becomes a breeze
- The ability to import study and user data from spreadsheets greatly cuts down on manual data entry
- Batch accessioning capabilities allow fast and efficient check-in of samples based on the specific protocol and study setup

With this module, NovoPath combines the benefits of an EDC and CTMS, and allows labs to complete both research studies and diagnostic testing using one system

- The system is 21 CFR Part 11 compliant, with secure electronic records and signatures, and a comprehensive, easy-to-access audit trail
- NovoPath maintains its emphasis on data security with multiple levels of user permissions and access controls
- An integrated web portal allows labs to provide sponsors with immediate, secure, and anytime/anywhere access to reports
